

Learning Plan - Personal Learning Goals

(Aim for a paragraph for each question below. Please know that if your answer is too brief, your marking tutor may request for a Resubmit.)

Describe any previous programming experience you may have and what you currently think programming is.

(Please know that the majority of SIT102 students do not have any prior programming experience, which is completely acceptable and nothing to worry about.)

I have some self-taught programming experience from personal projects I have worked on in my own time. I have experimented with writing code and building small tools, which has given me a basic familiarity with how programming languages work, but I have not had any formal education in programming until now. I think programming is essentially the process of writing instructions that tell a computer how to perform tasks and solve problems breaking down what you want to achieve into logical steps that a machine can follow.

What do you want to learn, and how will this help you in your future career?

I want to build a solid foundation in programming concepts and develop good habits from the start. While I have picked up some things on my own, I know there are gaps in my understanding of how programs are properly structured and tested. I would like to learn the fundamentals properly things like control flow, data types, and how to write clean, well-organised code. These skills will be important for my future career in IT, as programming is a core skill that is foundational to almost everything in the IT field.

What is your target grade and why are you aiming for this grade? What do you need to demonstrate to achieve this grade? Relate this to the meaning of each grade.

I am aiming for a Pass grade. According to the unit guide, a Pass demonstrates that I can work through structured resources to iteratively develop my understanding and that I have a foundational understanding of programming. I am choosing this target because I want to focus my time and energy on really nailing the core concepts without overextending myself. I would rather build a strong foundation at the Pass level than rush through higher-level tasks without fully understanding the basics. If I find myself progressing well, I am open to discussing a change in target grade with my tutor.

Have you joined the SIT102 Teams channel? Please view the 'Welcome to SIT102' announcement and note down the secret keyword.

Yes, I have joined the SIT102 Teams channel. The secret keyword is: String

I understand to achieve this grade I will need to stick with the following timeline:

Task		Suggested Week Due by Grade			
		Pass	Credit	Distinction	HD
P1	Learning Plan	1	1	1	1
P2	Building and Running	1	1	1	1
P3	Sequence and Data	2	2	1	2
P4	Control Flow	4	4	3	3
P5	Progress checkpoint	4	4	4	4
T1	Test 1 (run in week 5)	5	5	5	5
P6	C / C++	5	5	4	4
P7	Structuring code	7	6	5	4
P8	Structuring data	8	7	5	5
P9	Working with multiples	9	8	6	5
D2	Custom Program Plan	-	-	6	6
T2	Test 2 (run in week 9, 10, and 11) - hurdle to pass subject	9	9	9	9
C1	Indirect Access	-	9	8	7
C2	Another Language - Python	-	10	9	8
D3	Deep Dive Memory	-	-	9	8
C3	Classes and Objects	-	11	10	9
D4	Custom Program Implementation	-	-	11	10
D1	Active Collaborator	-	-	11	11
H1	Something Awesome	-	-	-	11
P10	Learning Summary	11	11	11	11

Only keep the column for your target grade – delete the others.

I understand how this unit works.

I, Joshua Pijaca, 223422713, confirm that I have read and understood how this unit works: I understand that:

- I will receive a grade in accordance with the tasks I complete.
- I can change my target grade at any time during the trimester, up until I submit my portfolio.
- I am responsible for providing evidence of my work to satisfy the requirements in each module and task completed.
- I acknowledge that I need to sit and pass Test 1 and Test 2, and that I need to attend the test on campus or online as indicated in the Learning Plan task sheet.
- Following my initial submission, I will work with my tutor and the teaching team to update and complete my submissions until they demonstrate I have achieved the learning objectives of the module.
- I understand I will only receive feedback on my task submissions up until the task's due date in OnTrack. After this point, I will need to ensure it is up to the required standard within my portfolio.
- I have reviewed the timeline in the Learning Plan task sheet, and below I have listed the dates I aim to submit my work for feedback.
- I commit to submit the initial submission of my work before the deadlines listed in the table above. I acknowledge that these deadlines can be modified by me, in agreement with my tutor, when the necessity occurs, and that I am responsible for requesting these modifications as soon as I become aware of the need to do so, and no later than the deadline to be modified.
